Description

Our program is designed to interest Obstetrics and Gynecology physicians. The course materials will provide the busy ObGyn practitioner with up-to-date, relevant, essential information that can be used immediately to improve patient care.

Learning Objectives

- Review the complications and management of complications of mid-urethral slings.
- Become familiar with the ultrasound findings associated with common fetal anomalies.
- Recognize the effects of neuroendocrine pathways on ovarian cancer growth and progression.
- Review the attributable risks and benefits of HT/ET as described in the Women’s Health Initiative study and learn the possible alternatives to HT/ET.
- Review the potential effects of cancer treatment on male and female fertility and learn preservation options.
- Review and discuss the history of common Ob/Gyn conditions and treatments of the ancient Egyptians.
- Review the fetal risks associated with congenital parovirus infection, identify best diagnostic tests and discuss appropriate treatment.
- Review the current literature on robotic technology, indications and patient selection for robotic surgery, and define preoperative and operative issues.
- Review the natural history of Human Papillomavirus, CIN, and cervical cancer, and methods of detection to improve management and counseling of patients.

Accreditation/Credits

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this educational activity for a maximum of 7.0 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
